THE HEART SINGLE FIELD THEORY

— (SOME SPECULATIONS ON THE ESSENTIAL UNITY OF THE UNIVERSE) —

A metaphysical theory on the nature of the universe, told in illustrated narrative. Develops progressively from the smallest unit through subnuclear and atomic structures, to biology and black holes.

"FANTASTIC...VERY ORIGINAL AND EXECUTED WITH ARTISTIC TASTE"

(Walter Lewin,
Center for Space Research, M.I.T.)

LIFE
Life is a manipulation of the nature of the universe. Every living system is in its essence of the universe. That requires increased complexity in its structure than the harmonic economy and subtlety of its structure. Each organism is a single unit undergoing and unfolding a heart within the ecological heart.

Cycles that are within a living system completed by its environment.

A tree is the image of a heart in all its beauty and clarity.

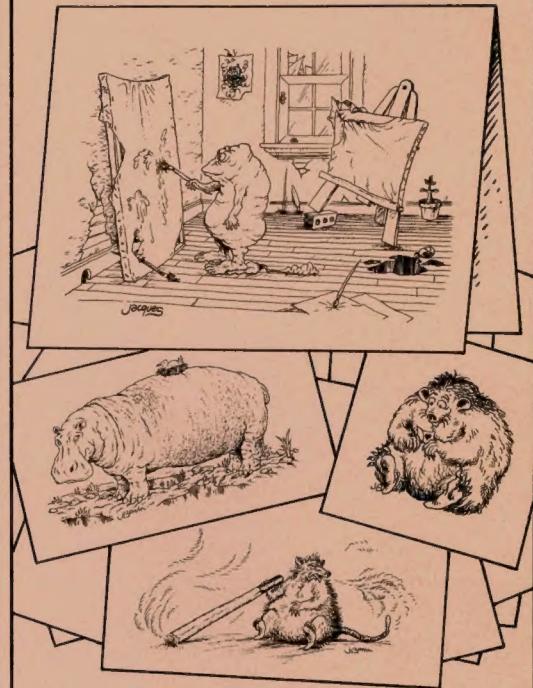

There are hearts within hearts.

"A POETIC TREATMENT OF THE SUBJECT"
(John A. Wheeler,
Director, Center for Theoretical Physics,
Austin, Texas)

"DELIGHTFUL READING... CLEARLY SERVES THE PURPOSE OF REMINDING ABSTRACT SCIENTISTS THAT HUMAN ELEMENTS ARE VERY IMPORTANT."
(Daniel Freedman,
Institute for Theoretical Physics,
Stony Brook, N.Y.)
